PROFILE SUMMARY:

Highly skilled BI professional with extensive IT experience, specializing in IBM Cognos Analytics and Microsoft Power BI. Expert in report development, dashboarding, metadata and data modeling and infrastructure management across multiple BI platforms. Proven ability to deliver scalable, enterprise-level business intelligence solutions using Cognos Framework Manager, Report Studio, Analysis Studio, Transformer and Dynamic Cube Modeling as well as Power BI development, DAX, Power Query (M language), SQL and Python. Expertise at transforming complex datasets into actionable insights through interactive dashboards that led leadership team to analyze the KPIs, trends and forecast data.

AREAS OF EXPERTISE:

Visualization	Power BI Desktop; Power BI Service; Power BI Report Builder; Cognos Reporting
Languages	DAX, Power Query (M), Python, R Script
Database	MySQL; MS SQL Server; RedShift; PostgreSQL; Oracle; DB2
ETL & Modeling	Star Schema; Data Warehousing; RDBMS; OLAP; Cognos Framework Manager Modeling; Transformer and Dynamic Cubes
Tools & Platform	Azure DevOps; REST APIs; Power BI Admin; Jira; Redmine; Confluence
Security & Admin	Row-Level Security (RLS); Power BI Gateway; AAD Permissions; Incremental Refresh
Reporting	KPI Dashboards, Executive Scorecards, Clinical Data Visualizations
Management	Communication; Client Management
Optimization	Trouble Shooting; Performance Tuning
Testing	QA; UAT; Prod

KEY ACHIEVEMENTS:

- Configured and deployed the Power BI Tenant application in Azure, leading report migration projects through cross-team coordination and successful stakeholder delivery
- Designed a global KPI dashboard for Teladoc Health using Power BI, enabling executive team on decision-making
- Received recognition for delivering a complex, user-centric dashboard using Python for advanced data visualizations, enabling the clinical operations team to identify data trends and drive business improvements
- Developed paginated reports that enabled client management to analyze revenue and growth trends, earning client appreciation and supporting the finance team in accurate and timely invoice generation
- Developed a complex Cognos report within a tight deadline, earning client appreciation for timely delivery
- Commended for optimizing Cognos report, resolving critical performance issues and significantly improving report efficiency
- Automated report delivery via email, streamlining access and eliminating the need for manual retrieval from users
- Delivered reports with 95% accuracy, earning recognition for data quality and reliability, which empowered stakeholders to confidently rerun reports using different filters and shorter time periods for deeper insights

PROFESSIONAL EXPERIENCE:

📍 **Senior Business Intelligence Developer, Teladoc Health Inc, Toronto, Canada** **Mar 2020 - Mar 2025**

- Led a large-scale migration project, successfully transitioning 150+ reports from Jasper to IBM Cognos, ensuring seamless functionality, improved performance, and alignment with enterprise reporting standards
- Received recognition for delivering a complex, user-centric dashboard using Python for advanced data visualizations, enabling the clinical operations team to identify data trends and drive business improvements
- Coordinated with business analysts and stakeholders to gather detailed requirements and translate them into effective, scalable BI solutions that drive data-driven decision-making
- Proficient in designing interactive dashboards, data visualizations, and automate reports using Power BI to influence business outcomes
- Developed dynamic Power BI dashboards tailored to business requirements, enabling data-driven decision-making and operational efficiency
- Skilled in developing data models, DAX measures, and calculated columns to deliver customized business metrics and actionable analytics
- Built optimized semantic models and query objects in Power BI, reducing redundant reporting efforts and accelerating dashboard development for end users

- Identified and resolved reporting issues in Power dashboards and data models, optimizing queries, DAX measures, and refresh schedules — reducing report load time by 60% and improving data accuracy for business users
- Troubleshoot issues in reports and data models, optimizing queries, DAX measures, and refresh schedules to improve performance
- Implemented Row-Level Security (RLS) to customize data visibility for three distinct organizational roles, eliminating the need for multiple report versions
- Integrated incremental refresh policies in the Power BI Service to handle large historical datasets efficiently, slicing only new or changed data
- Managed Cognos servers to ensure system stability and uptime following planned or unscheduled maintenance, minimizing disruption and maintaining consistent report availability
- Generated reports for internal and external clients and securely shared them via the client's SharePoint site, ensuring controlled access and data confidentiality

✦ **Senior Software Engineer, Emids Technologies, Bengaluru**

Sep 2019 - Feb 2020

- Optimized performance of long-running reports by configuring Governor settings in the Cognos Framework Manager model, improving query processing and resource utilization—resulting in significant enhancements to major KPI reports and overall reporting efficiency
- Developed lists, crosstab reports, combination charts, and master-detail reports using Report Studio to support comprehensive data analysis and visualization
- Extensive experience in creating relationships between query subjects to design robust framework models in Cognos Framework Manager, adhering to industry best practices for data modeling
- Automated report delivery and distribution using the Control-M scheduling tool, enhancing operational efficiency and ensuring timely access to critical business insights

✦ **Senior Consultant, Capgemini Private Limited, Bengaluru**

Jan 2017 - Jul 2019

- Actively contributed to the enhancement, redesign, and development of existing reports to improve functionality, performance, and user experience—resulting in significant client appreciation and improved overall usability
- Excelled in modifying relational, multidimensional, and Transformer models in Cognos Framework Manager to meet evolving report design requirements and ensure accurate, reliable data representation
- Collaborated with stakeholders to define business strategy, gather requirements, and develop Business Requirement Documents (BRDs), including the design of report mockups to support data-driven decision-making
- Developed complex reports using Report Studio, including lists, crosstabs, drill-through reports, and conditional formatting, while leveraging render variables to enhance dynamic report behavior
- Scheduled and managed Cognos jobs to automate the delivery of daily, weekly, biweekly, and monthly report outputs for business users, ensuring timely access to critical insights
- Performed import and export operations to deploy packages and reports across multiple environments, ensuring smooth transitions between development, testing, and production

✦ **Senior Software Engineer, LTI Mindtree Ltd. (Formerly Mindtree Ltd)
A Larsen & Toubro Infotech Group Company, Bengaluru**

Dec 2013 - Dec 2016

- Received Client appreciation for optimizing long-running SQL queries by over 70%, reducing report run time from 4+ hours to under 1 hour in Cognos, and for implementing integrated dashboards with channel-based portlet communication to enhance user experience and support timely business decisions

✦ **Software Engineer, Infinite Computer Solutions Pvt Ltd, Bengaluru**

Jun 2010 - Jul 2013

- Developed diverse reports in Cognos Report Studio—including lists, charts, and drill-through reports—aligned with client requirements. Enhanced user interaction by creating various prompt pages for report flexibility. Updated existing reports based on change requests to maintain accuracy. Built determinants, calculations, and filters in Framework Manager to ensure precise data modeling and reporting

EDUCATION & PROFESSIONAL DEVELOPMENT:

- **Microsoft Certified Data Analyst (PL-300) Certification** – Completion anticipated by Aug 2025
- **Cognos BI Training** – IBM Company offered training, Bengaluru, India
- **Java and C Programming Certification** - NIIT, Bengaluru, India
- **Bachelor of Engineering Degree in Information Science** - Visvesvaraya Technological University (VTU), Belgaum, India
